

A young girl with long brown hair is looking out of a train window. Her reflection is visible in the glass, creating a symmetrical image. The background outside the window shows a blurred landscape of fields and trees under an overcast sky. The train tracks and rails are visible in the foreground, receding into the distance.

## Britain is wide open to Russian undersea sabotage

Critical gas pipelines, power lines and data cables are the “soft belly of British security,” ministers have been warned.

LONDON — Britain’s undersea infrastructure is highly vulnerable to Russian sabotage.

That’s the stark warning from defense and energy experts ahead of the country’s major strategic defense review, expected next week.

They warn that critical gas pipelines, power lines and data cables are the “soft belly of British security” — leaving the country exposed to potentially “catastrophic” sabotage at the hands of Russia or other enemies.
